

NGUYỄN HẢI LONG

IT Intern | Java Backend / Full-stack / DevOps

Phone: 0931527657
Location: Hanoi, Vietnam
Email: nhailong235@gmail.com
GitHub: github.com/nhailong235-create

CAREER OBJECTIVE

Third-year Information Technology student at Thang Long University with solid foundational knowledge in Backend Development, Web Development, and DevOps. Experienced in executing projects utilizing Java, Spring Boot, MySQL, HTML, CSS, JavaScript, and Bootstrap; possessing practical experience with REST APIs, JWT, Git/GitHub version control, Docker, and CI/CD concepts. Seeking a Backend or DevOps Intern position to apply theoretical knowledge to real-world projects, enhance application development, deployment, and operational skills, while continuously learning about Linux, Cloud, and Networking.

EDUCATION

Thang Long University **2024 - 2029**
Major: Information Technology
Currently in 3rd Year | Focus: Programming & Web Development

TECHNICAL SKILLS

Programming Languages	Java, C++, Python, HTML, CSS, JavaScript, Bootstrap
Backend Development	Spring Boot, Spring Web, Spring Data JPA, REST API, FastAPI, JWT Authentication, BCrypt
Databases	MySQL, SQL, CRUD operations, database schema design & relationships
Tools & Platforms	Git/GitHub (Version Control, Branching, Merging, Pull Requests), Docker, Postman, IntelliJ IDEA, MySQL Workbench
Linux Systems	Basic Linux usage, essential command-line operations (CLI)
Networking Knowledge	TCP/IP, HTTP/HTTPS, DNS, IP Addressing, CORS, Client-Server Model; studied CCNA foundational knowledge (no official certification yet).

PERSONAL PROJECTS

USTH AVIATION SOCIETY - WEBSITE & FORUM **Aug 2026**

Technologies: Java, Spring Boot, MySQL, HTML, CSS, JavaScript, Bootstrap, JWT, Docker, Git/GitHub

A web application and community forum built for USTH Aviation Society, supporting user management, post creation, content categorization, and administration.

- Developed RESTful APIs using Spring Boot; designed and managed relational schemas in MySQL.
- Implemented authentication and authorization flows: Registration, Login, JWT tokens, and RBAC (Member, Admin, Root).
- Built features for post creation, image/PDF uploads, full-text search, pagination, and category filtering.
- Developed admin dashboards for user administration and forum content moderation.
- Integrated Frontend with Backend services via RESTful APIs.
- Utilized Docker for containerized development environments, Git/GitHub for source code management and version control; researched deployment pipelines.

Role: *Full-stack Developer*

GALAXY MOVIE - MOVIE MANAGEMENT WEBSITE **Mar 2025**

Technologies: Python, FastAPI, MySQL, HTML, CSS, JavaScript, Bootstrap, Git/GitHub

A web application for managing and displaying movie catalog information stored in a MySQL database.

- Designed and constructed RESTful APIs with FastAPI and structured data models in MySQL.
- Developed secure user registration and login functionality.
- Implemented responsive UI to render movie lists, detailed views, and genre-based filtering.
- Connected dynamic frontend components to backend APIs and applied Bootstrap for responsive styling.

Role: *Full-stack Developer*

C++ LIBRARY MANAGEMENT PROGRAM **Oct 2025**

Technologies: C++, Git

A desktop console application designed to streamline library operations, book records, and user management.

- Managed structured records for books and library users.
- Implemented CRUD operations (Create, Read, Update, Delete) and search functionalities.
- Handled borrowing and returning workflows with accurate status tracking.
- Applied Object-Oriented Programming (OOP) principles and fundamental data structures.

Role: *Developer*

SOFT SKILLS

Self-learning capability, problem-solving & debugging, technical research, effective communication, adaptability, and teamwork.

FOREIGN LANGUAGES

English: Proficient in reading and comprehending technical documentation, researching programming resources in English, and basic communication in academic and working environments. *Certificates: None currently.*

ADDITIONAL KNOWLEDGE

Object-Oriented Programming (OOP), Data Structures & Algorithms, Client-Server Architecture, REST API design, MVC Pattern, Authentication & Authorization, JWT, Database & SQL, Git/GitHub version control workflows, Basic Linux commands, Computer Networking Fundamentals.

Additional Information: Strong capability to self-learn emerging technologies through documentation and hands-on projects; experienced in troubleshooting issues across Frontend, Backend, and Database tiers; passionate about Backend Development, DevOps, and Cloud Computing.
